

Microsoft Word (Office 2016): Core Document Creation, Collaboration and Communication; Exam 77-725

Successful candidates for the Microsoft Word (Office 2016) exam have approximately 150 hours of instruction and hands-on experience with the product. They will demonstrate the correct application of the principle features of Word 2016 by creating and editing 2- to 3-page documents for a variety of purposes and situations. Document examples include professional-looking reports, multi-column newsletters, résumés, and business correspondence.

MOS 2016 certification exams introduce a new performance-based format for improved testing of a candidate's knowledge, skills and abilities using the MOS 2016 programs:

- MOS 2016 exam task instructions generally do not include the command name as in previous versions. For example, function names are avoided, and are replaced with descriptors. This means candidates must understand the purpose and common usage of the program functionality in order to successfully complete the tasks in each of the projects.
- The MOS 2016 exam format incorporates multiple projects.
